

Brian Lammers is Vice President of Regional Development for RES with responsibility for identifying and advancing utility-scale wind and solar generation development opportunities in the northern US.

Since 1998 Brian has led origination, development and investment initiatives resulting in more than 3 GW of utility-scale renewable generation in North America.

Before joining RES, Brian formed Advanced Generation Development and sold a portfolio of wind generation development assets to a leading renewables IPP.

He has held leadership positions at Exelon Generation, EDPR North America, Deere & Company and Gamesa. While at John Deere, Brian worked with Wolverine Power Supply Cooperative to develop, contract and construct Michigan's first multi-megawatt utility scale wind generation project, Harvest Wind, in 2007.

Brian has an MBA with honors from the University of Minnesota and a BS from the University of Wisconsin – Madison. He lives in Minneapolis with his wife and three children.
