

# Greg Bolino

Greg Bolino is Managing Director at Accenture and leads the Utilities Strategy practice for North America. He has 34 years of experience helping client executives transform their business and operating models to improve results and enable growth. He has worked with clients across several industries including utilities, telecommunications, media and cable, and retailers in the US and Europe.

Mr. Bolino has worked extensively with Utilities in North America and Europe including gas and electric utilities in regulated and competitive markets. His work includes strategies for growth, business transformations, market restructurings, and mergers across retail, T&D and generation. More recently his work has focused on the evolving utility business model, including scenario planning, utility of future strategies, energy services, and grid investment strategies. He has published numerous perspectives on the changing utility model, including [Lead the Charge in eMobility](#), [The High Stakes of Low Carbon](#), [Digital Disruption of the Electric Industry](#) (published with the World Economic Forum), [The Digital Utility: Operating at the Heart of the New Energy System](#), and [Capital Theft – Stealing the Utility Business model](#).

Mr. Bolino earned a Bachelor of Science in Electrical Engineering at The Johns Hopkins University and an MBA from the University Michigan.
